Senior Engineer (Commerce) | Twitch - Amazon | January 2024 – Current

- Led adoption of AI-assisted development workflows across Commerce mobile team, increasing feature delivery velocity by 3–5x through standardized prompt patterns, internal tooling, and team enablement
- Designed a repeatable AI-driven experimentation workflow, reducing iteration cycles by ~40% and accelerating time-to-launch for revenue initiatives
- Introduced a structured tech debt prioritization framework adopted across the mobile org (50+ engineers), improving roadmap predictability and reducing regressions
- Led transition to an open contribution model for Twitch Mobile, increasing cross-team contributions by 10x and reducing platform silos

Senior iOS Engineer (Ads) | Twitch - Amazon | January 2021 – January 2024

- Led delivery of 10+ major mobile ad initiatives, partnering cross-functionally across Twitch and Amazon to drive multi-million-dollar revenue impact
- Owned all major mobile advertising efforts (2021–2023), defining ambiguous requirements and aligning distributed teams to successfully launch 10+ ad products
- Developed modular, component-based ad architecture enabling unit test coverage and increasing developer velocity by ~30%
- Pioneered Twitch display and audio ad formats on mobile, increasing ad supply by over 100%
- Co-led migration of iOS architecture to MVI, enabling SwiftUI adoption and improving testability and consistency
- Served as senior technical leader within 50+ engineer mobile org; directly led cross-platform ads team (iOS, Android, interns)

iOS Engineer | Twitch - Amazon | June 2019 – January 2021

- Maintained the Twitch core video playback and ad experience, supporting HLS and MP4 playback with AVPlayer and Twitch's custom video player powering billions of hours watched

iOS Engineer | Macy's | July 2017 – May 2019

- Co-led org wide effort to rebuild the Macy's app using the VIPER architecture pattern

Education

UC San Diego | B.S. Computer Science | June 2017
